The Med MD Program, unlike all other Stanford graduate degree programs, begins charging full tuition at 8 units. Due to this anomaly, the “Units TAL Provides” column is not precise. Tuition allowance is a monetary value (not a number of units) that is proportional to the appointment percentage. Regardless of the units listed in this column, combination appointments totaling 50% earn the dollar equivalent of one unit of MD tuition times 10.

**Summer Appointments Greater than 50%**

The maximum Assistantship appointment for Fall, Winter, and Spring Quarters is 50%. Appointments greater than 50% are allowed during Summer Quarter only, up to a maximum appointment of 90%.

Eligibility for assistantships during Summer Quarter is no different than for other quarters, except that the enrollment requirement (minimum of 8 units enrollment) becomes 1 unit in the Summer Quarter.

Tuition Allowance for Summer appointments of 50% or less is described in the table above.

For information about Tuition Allowance for Summer appointments greater than 50% and up to 90%, see the table for Summer TAL.

Research Rate students receive TAL equal to Research Rate tuition, and that amount is charged entirely to the source of salary funding.

\* Separately, 10% and 40% appointments do not provide tuition allowance sufficient to cover the corresponding 1,2,3 and 8-Unit tuition rates. Combined though, they equal a 50% appointment and provide the appropriate amount of TAL.
